

TRANSITS FOR MOBILE SMART PHONES

April 29, 2011

By Michael Erlewine (Michael@Erlewine.net)

I have been busy designing the layout for our new “Astrology Now” Transit Forecast, which will be released in Open Beta is about a week.

This transit forecast will provide one month or up to a year of timed aspects to your chart in easy-to-read format. Each aspect will include full interpretation, keywords, astro-jargon, and an astro*image card PLUS a one-line list of aspects will be found at the end of the report.

I just finished designing the headers for all twelve months and thought I would show you April's graphic.

The name “Astrology Now” is used with kind permission by Noel Tyl who owns the name.
